March 25, 2009

Dear CASE Member:

The Council of Administrators of Special Education (CASE) is pleased to announce the endorsement of **AutismPro**. Our Publications and Product Review Committee thoroughly reviewed AutismPro last fall and made a recommendation to the CASE Executive Committee for endorsement.

AutismPro is a customizable package of 21st century tools and resources that enables administrators to build capacity and helps teachers improve outcomes for students with autism. The development of AutismPro was assisted by well-respected autism experts such as Dr. Kathleen Quill of the Autism Institute and Dr. Cathy Pratt of the Autism Society of America.

AutismPro includes two web-based applications:

- **AutismPro Workshops** provides focused training on how to create student IEPs and apply them to typical school situations. Delivered in an online format, users can access up to 45 hours of video-rich learning modules that will teach them what they need to know now.
- **AutismPro Resources** provides the printable resources needed to put such training into practice. An online database with more than 3500 lessons allows users to search for and print out daily plans to help students learn skills and avoid challenging behavior.

AutismPro is providing a free web seminar for all CASE members entitled, *"Leveraging The Stimulus: How to Turn Federal Stimulus Dollars into Lasting Benefits for Students with Autism."* As a member, you also have the option of booking a one hour consulting session to determine if AutismPro can help your school district. To learn more and to register, please visit www.AutismPro.com/CASE.

With the Stimulus Act providing a unique opportunity to invest in innovative tools, I highly recommend that you consider AutismPro as part of your district's strategic plan for the future.

Thanks for all you do **every** day for the students, parents, staff, and community,

Luann L. Purcell, Ed.D.
Executive Director

P.S. CASE members qualify for a 10% discount on the lowest negotiated price for AutismPro packages until June 30, 2009.
